Hi Eric,

Some info for you on grain size analysis. Dave says it's no problem getting it done this summer, but needs to have a copy of the SAP/QAPP and the analysis request form filled out. Just an FYI, this analysis does grain size through the sieves, but reports out in a % by weight basis. Not sure that is going to get you what you want, but we could improvise and probably do a % by volume with a little tweaking. Let me know what you think.

Hilary

Here you go Hil. For grain size on the request form "other" would be the area to use for the analysis and sample info.
